What's new in the  
OECD QSAR Toolbox v  
4.6

- Enhances connectivity with IUCLID.
- Increases capacity to use external models.
- Improves access to information about tested substances in ECHA's chemicals database.
- Three new databases (Half-Life Mammalian Toxicokinetic Database MamTKDB; Toxicity data on pharmaceuticals (US FDA); Skin sensitization OASIS (normalized)).
- Up-to-date databases, profilers, and simulators.
- For more information: <https://qsartoolbox.org/inc/uploads/2023/05/Toolbox-4.6-Release-Notes.pdf>
