What's new in the OECD QSAR Toolbox v 4.6	
	▪ Enhances connectivity with IUCLID.
	▪ Increases capacity to use external models.
	▪ Improves access to information about tested substances in ECHA's chemicals database.
	▪ Three new databases (Half-Life Mammalian Toxicokinetic Database MamTKDB; Toxicity data on pharmaceuticals (US FDA); Skin sensitization OASIS (normalized)).
	▪ Up-to-date databases, profilers, and simulators.
	▪ For more information: https://qsartoolbox.org/inc/uploads/2023/05/Toolbox-4.6-Release-Notes.pdf
